Camper's Primary Dr.: _____ Phone # _____

2nd Emergency Contact: _____ Phone: _____ Relationship: _____

On Site Leader _____ Phone # _____ Camp: (please circle) 1, 2, 3

Note: Any potential camper with history of seizure activity should supply a Medical Doctor's statement listing the following: limitations, environmental triggers and procedures to use in event of a seizure while at KAA camps.

KAA Kamp is a sports camp located a minimum of one hour from emergency rooms/hospitals.

Each person with a seizure history is responsible for bringing adequate supplies of all medication to be used for preventing or treating their seizure activity.

In the interest of safety, any person who has experienced any seizure activity in the past 6 months is ineligible to attend camp. Exposure to hot weather, dehydration, increased physical activity, loud music and cheers, loud sounds, strobe lights, and other factors may precipitate seizures and are risk factors at camp for a person with a seizure history.

Seizure information with medical history must be received by Health Services at least 3 weeks prior to arrival of the registrant; **this is not negotiable and there will be no exceptions or deviations from this rule. Attendees who arrive to camp with an undisclosed seizure history will be sent home at the group's expense.** If there are concerns by Health Services regarding information received, you will be contacted prior to the start of your camp session.
